vs.)	
)	
SYNGENTA CROP PROTECTION LLC,)	
AND SYNGENTA AG)	
)	
Defendants.)	

COMPLAINT

Plaintiff Donald Newton, by and through his undersigned counsel, hereby file this Complaint against Defendants SYNGENTA CROP PROTECTION LLC and SYNGENTA AG directly into MDL No. 3004 in the United States District Court for the Southern District of Illinois. Plaintiff files this *Complaint* as permitted by Case Management Order No. 1 (Doc. #16) entered by this Court on June 10, 2021. and allege as follows:

I. SUMMARY OF THE CASE

1. Paraquat is a synthetic chemical compound that since the mid-1960s has been developed, registered, manufactured, distributed, sold for use, and used as an active ingredient in herbicide products (“paraquat”) developed, registered, formulated, distributed, and sold for use in the United States, including the State of Georgia.¹

2. Defendants are companies and successors-in-interest to companies that manufactured, distributed, and sold paraquat for use in Georgia, acted in concert with others

¹ Paraquat dichloride (EPA Pesticide Chemical Code 061601) or paraquat methosulfate (EPA Pesticide Chemical Code 061602).

who manufactured, distributed, and sold paraquat for use in Georgia, sold and used paraquat in Georgia, or owned property in Georgia where paraquat was used.

3. Plaintiff brings this suit against Defendants to recover damages for personal injuries resulting from Plaintiff's exposure to paraquat over many years in Georgia.²

II. PARTIES

A. Plaintiff

4. Plaintiff Donald Newton is a citizen and resident of the State of Georgia

5. Plaintiff Donald Newton developed and suffers from Parkinson's disease ("PD") caused by exposure to paraquat within the State of Georgia.

B. Defendants

6. Defendant Syngenta Crop Protection LLC ("SCPLLC") is a Delaware company with its principal place of business in Greensboro, North Carolina. SCPLLC is a wholly owned subsidiary of Defendant Syngenta AG.

7. Defendant Syngenta AG ("SAG") is a foreign corporation with its principal place of business in Basel, Switzerland.

III. JURISDICTION AND VENUE

8. This Court has subject-matter jurisdiction over this action under 28 U.S.C. § 1332 because there is complete diversity of the plaintiff and the defendants and the matter in controversy exceeds the sum or value of \$75,000, exclusive of interest and costs.

9. Venue is proper in this district under 28 U.S.C. §1391 because Defendants' conduct business in this District, are subject to jurisdiction in this district, and have sold, marketed, and or distributed paraquat within this District at all times relevant to this suit,

² Unless otherwise indicated, "Plaintiff" refers to the individual who had direct exposure to Paraquat.

because a substantial part of the acts or occurrences giving rise to this suit occurred within this District.

10. Notwithstanding the previous paragraph, this Complaint is filed in the Southern District of Illinois pursuant to the Court's Order of June 10, 2021, allowing direct filing of actions. However, it is not intended as a waiver of any rights relating to *Lexecon*, venue, or choice of law. To the contrary, Plaintiff expressly reserves any *Lexecon* rights or rights relating to venue or choice of law.

IV. ALLEGATIONS COMMON TO ALL CAUSES OF ACTION

A. Defendants and their predecessors.

1. Syngenta Crop Protection LLC and Syngenta AG

11. In 1926, four British chemical companies merged to create the British company that then was known as Imperial Chemical Industries Ltd. and ultimately was known as Imperial Chemical Industries PLC ("ICI").

12. In or about 1971, ICI created or acquired a wholly owned U.S. subsidiary organized under the laws of the State of Delaware, which at various times was known as Atlas Chemical Industries Inc., ICI North America Inc., ICI America Inc., and ICI United States Inc., and ultimately was known as ICI Americas Inc. (collectively "ICI Americas").

13. In or about 1992, ICI merged its pharmaceuticals, agrochemicals, and specialty chemicals businesses, including the agrochemicals business it had operated at one time through a wholly owned British subsidiary known as Plant Protection Ltd. and later as a division within ICI, into a wholly owned British subsidiary known as ICI Bioscience Ltd.

14. In 1993, ICI demerged its pharmaceuticals, agrochemicals, and specialty chemicals businesses, from which it created the Zeneca Group, with the British company Zeneca Group PLC as its ultimate parent company.

15. As a result of ICI's demerger and creation of the Zeneca Group, ICI Bioscience Ltd. was demerged from ICI and merged into, renamed, or continued its business under the same or similar ownership and management as Zeneca Ltd., a wholly owned British subsidiary of Zeneca Group PLC.

16. Before ICI's demerger and creation of the Zeneca Group, ICI had a Central Toxicology Laboratory that performed and hired others to perform health and safety studies that were submitted to the U.S. Department of Agriculture ("USDA") and the U.S. Environmental Protection Agency ("EPA") to secure and maintain the registration of paraquat and other pesticides for use in the United States.

17. As a result of ICI's demerger and creation of the Zeneca Group, ICI's Central Toxicology Laboratory became Zeneca Ltd.'s Central Toxicology Laboratory.

18. After ICI's demerger and creation of the Zeneca Group, Zeneca Ltd.'s Central Toxicology Laboratory continued to perform and hire others to perform health and safety studies that were submitted to EPA to secure and maintain the registration of paraquat and other pesticides for use in the United States.

19. As a result of ICI's demerger and creation of the Zeneca Group, ICI Americas was demerged from ICI and merged into, renamed, or continued its business under the same or similar ownership and management as Zeneca, Inc. ("Zeneca"), a wholly owned subsidiary of Zeneca Group PLC organized under the laws of the State of Delaware.

20. In 1996, the Swiss pharmaceutical and chemical companies Ciba-Geigy Ltd. and Sandoz AG merged to create the Novartis Group, with the Swiss company Novartis AG as the ultimate parent company.

21. As a result of the merger that created the Novartis Group, Ciba-Geigy Corporation, a wholly owned subsidiary of Ciba-Geigy Ltd. organized under the laws of the State of New York, was merged into or continued its business under the same or similar ownership and management as Novartis Crop Protection, Inc. (“NCPI”), a wholly owned subsidiary of Novartis AG organized under the laws of the State of Delaware.

22. In 1999, the Swedish pharmaceutical company Astra AB merged with Zeneca Group PLC to create the British company AstraZeneca PLC, of which Zeneca Ltd. and Zeneca were wholly owned subsidiaries.

23. In 2000, Novartis AG and AstraZeneca PLC spun off and merged the Novartis Group’s crop protection and seeds businesses and AstraZeneca’s agrochemicals business to create the Syngenta Group, a global group of companies focused solely on agribusiness, with Defendant Syngenta AG (“SAG”) as the ultimate parent company.

24. As a result of the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, Zeneca Ltd. was merged into, renamed, or continued its business under the same or similar ownership and management as Syngenta Ltd., a wholly owned British subsidiary of SAG.

25. As a result of the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, Zeneca Ltd.’s Central Toxicology Laboratory became Syngenta Ltd.’s Central Toxicology Laboratory.

26. Since the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, Syngenta Ltd.'s Central Toxicology Laboratory has continued to perform and hire others to perform health and safety studies for submission to the EPA to secure and maintain the registration of paraquat and other pesticides for use in the United States.

27. As a result of the Novartis/AstraZeneca spinoff and merger that created the Syngenta Group, NCPI and Zeneca were merged into and renamed, or continued to do their business under the same or similar ownership and management, as Syngenta Crop Protection, Inc. ("SCPI"), a wholly owned subsidiary of SAG organized under the laws of the State of Delaware.

28. In 2010, SCPI was converted into Defendant Syngenta Crop Protection LLC ("SCPLLC"), a wholly owned subsidiary of SAG organized and existing under the laws of the State of Delaware with its principal place of business in Greensboro, North Carolina.

29. SAG is a successor in interest to the crop-protection business of its corporate predecessor Novartis AG.

30. SAG is a successor in interest to the crop-protection business of its corporate predecessor AstraZeneca PLC.

31. SAG is a successor in interest to the crop-protection business of its corporate predecessor Zeneca Group PLC.

32. SAG is a successor in interest to the crop-protection business of its corporate predecessor Imperial Chemical Industries PLC, previously known as Imperial Chemical Industries Ltd.

33. SAG is a successor in interest to the crop-protection business of its corporate predecessor ICI Bioscience Ltd.

34. SAG is a successor in interest to the crop-protection business of its corporate predecessor Plant Protection Ltd.

35. SCPLLC is a successor in interest to the crop-protection business of its corporate predecessor SCPI.

36. SCPLLC is a successor in interest to the crop-protection business of its corporate predecessor NCPI.

37. SCPLLC is a successor in interest to the crop-protection business of its corporate predecessor Ciba-Geigy Corporation.

38. SCPLLC is a successor in interest to the crop-protection business of its corporate predecessor Zeneca Inc.

39. SCPLLC is a successor by merger or continuation of business to its corporate predecessor ICI Americas Inc., previously known as Atlas Chemical Industries Inc., ICI North America Inc., ICI America Inc., and ICI United States Inc.

40. SCPLLC does substantial business in the State of Georgia, including the following:

- a. markets, advertises, distributes, sells, and delivers paraquat and other pesticides to distributors, dealers, applicators, and farmers in the State of Georgia;

- b. secures and maintains the registration of paraquat and other pesticides with the EPA and the State of Georgia to enable itself and others to manufacture, distribute, sell, and use these products in the State of Georgia; and
- c. performs, hires others to perform, and funds or otherwise sponsors or otherwise funds the testing of pesticides in the State of Georgia.

41. SAG is a foreign corporation organized and existing under the laws of Switzerland, with its principal place of business in Basel, Switzerland.

42. SAG is a holding company that owns stock or other ownership interests, either directly or indirectly, in other Syngenta Group companies, including SCPLLC.

43. SAG is a management holding company.

44. Syngenta Crop Protection AG (“SCPAG”), a Swiss corporation with its principal place of business in Basel, Switzerland, is one of SAG’s direct, wholly owned subsidiaries.

45. SCPAG employs the global operational managers of production, distribution, and marketing for the Syngenta Group’s Crop Protection (“CP”) and Seeds Divisions.

46. The Syngenta Group’s CP and Seeds Divisions are the business units through which

SAG manages its CP and Seeds product lines.

47. The Syngenta Group’s CP and Seeds Divisions are not and have never been corporations or other legal entities.

48. SCP AG directly and wholly owns Syngenta International AG (“SIAG”).

49. SIAG is the “nerve center” through which SAG manages the entire Syngenta Group.

50. SIAG employs the “Heads” of the Syngenta Group’s CP and Seeds Divisions.

51. SIAG also employs the “Heads” and senior staff of various global functions of the

Syngenta Group, including Human Resources, Corporate Affairs, Global Operations, Research and Development, Legal and Taxes, and Finance.

52. Virtually all of the Syngenta Group’s global “Heads” and their senior staff are housed in the same office space in Basel, Switzerland.

53. SAG is the indirect parent of SCPLLC through multiple layers of corporate ownership:

- a. SAG directly and wholly owns Syngenta Participations AG;
- b. Syngenta Participations AG directly and wholly owns Seeds JV C.V.;
- c. Seeds JV C.V. directly and wholly owns Syngenta Corporation;
- d. Syngenta Corporation directly and wholly owns Syngenta Seeds, LLC;
- e. Syngenta Seeds, LLC directly and wholly owns SCPLLC.

54. Before SCPI was converted to SCPLLC, it was incorporated in Delaware, had its principal place of business in North Carolina, and had its own board of directors.

55. SCPI’s sales accounted for more than 47% of the sales for the entire Syngenta Group in 2019.

56. SAG has purposefully organized the Syngenta Group, including SCPLLC, in such a way as to attempt to evade the authority of courts in jurisdictions in which it does substantial business.

57. Although the formal legal structure of the Syngenta Group is designed to suggest otherwise, SAG in fact exercises an unusually high degree of control over its country-specific business units, including SCPLLC, through a “matrix management” system of functional reporting to global “Product Heads” in charge of the Syngenta Group’s unincorporated Crop Protection and Seeds Divisions, and to global “Functional Heads” in charge of human resources, corporate affairs, global operations, research and development, legal and taxes, and finance.

58. The lines of authority and control within the Syngenta Group do not follow its formal legal structure, but instead follow this global “functional” management structure.

59. SAG controls the actions of its far-flung subsidiaries, including SCPLLC, through this global “functional” management structure.

60. SAG’s board of directors has established a Syngenta Executive Committee (“SEC”), which is responsible for the active leadership and the operative management of the Syngenta Group, including SPLLC.

61. The SEC consists of the CEO and various global Heads, which currently are:

- a. The Chief Executive Officer;
- b. Group General Counsel;
- c. The President of Global Crop Protection;
- d. The Chief Financial Officer;

- e. The President of Global Seeds; and
- f. The Head of Human Resources.

62. SIAG employs all of the members of the Executive Committee.

63. Global Syngenta Group corporate policies require SAG subsidiaries, including SPLLC, to operate under the direction and control of the SEC and other unincorporated global management teams.

64. SAG's board of directors meets five to six times a year.

65. In contrast, SCPI's board of directors rarely met, either in person or by telephone, and met only a handful of times over the last decade before SCPI became SCPLLC.

66. Most, if not all, of the SCPI board's formal actions, including selecting and removing SCPI officers, were taken by unanimous written consent pursuant to directions from the SEC or other Syngenta Group global or regional managers that were delivered via e-mail to SCPI board members.

67. Since SCPI became SCPLLC, decisions that are normally made by the board or managers of SCPLLC in fact continue to be directed by the SEC or other Syngenta Group global or regional managers.

68. Similarly, Syngenta Seeds, Inc.'s board of directors appointed and removed SCPI board members at the direction of the SEC or other Syngenta Group global or regional managers.

69. Since SCPI became SCPLLC, the appointment and removal of the manager(s) of SCPLLC continues to be directed by the SEC or other Syngenta Group global or regional managers.

70. The management structure of the Syngenta Group's CP Division, of which SCPLLC is a part, is not defined by legal, corporate relationships, but by functional reporting relationships that disregard corporate boundaries.

71. Atop the CP Division is the CP Leadership Team (or another body with a different name but substantially the same composition and functions), which includes the President of Global Crop Protection, the CP region Heads (including SCPLLC President Vern Hawkins), and various global corporate function Heads.

72. The CP Leadership Team meets bi-monthly to develop strategy for new products, markets, and operational efficiencies and to monitor performance of the Syngenta Group's worldwide CP business.

73. Under the CP Leadership Team are regional leadership teams, including the North America Regional Leadership Team (or another body with a different name but substantially the same composition and functions), which oversees the Syngenta Group's U.S. and Canadian CP business (and when previously known as the NAFTA Regional Leadership Team, also oversaw the Syngenta Group's Mexican CP business).

74. The North America Regional Leadership Team is chaired by SCPLLC's president and includes employees of SCPLLC and the Syngenta Group's Canadian CP company (and when previously known as the NAFTA Regional Leadership Team, also included employees of the Syngenta Group's Mexican CP company).

75. The Syngenta Group's U.S. and Canadian CP companies, including SCPLLC, report to the North America Regional Leadership Team, which reports to the CP Leadership Team, which reports to the SEC, which reports to SAG's board of directors.

76. Some members of the North America Regional Leadership Team, including some SCPLLC employees, report or have in the past reported not to their nominal superiors within the companies that employ them, but directly to the Syngenta Group's global Heads.

77. Syngenta Group global Heads that supervise SCPLLC employees participate and have in the past participated in the performance reviews of these employees and in setting their compensation.

78. The Syngenta Group's functional reporting lines have resulted in employees of companies, including SCPLLC, reporting to officers of remote parent companies, officers of affiliates with no corporate relationship other than through SAG, or officers of subsidiary companies.

79. SCPLLC performs its functions according to its role in the CP Division structure:

- a. CP Division development projects are proposed at the global level, ranked and funded at the global level after input from functional entities such as the CP Leadership Team and the North America Regional Leadership Team, and given final approval by the SEC;
- b. New CP products are developed by certain Syngenta Group companies or functional groups that manage and conduct research and development functions for the entire CP Division;
- c. These products are then tested by other Syngenta Group companies, including SCPLLC, under the direction and supervision of the SEC, the CP Leadership Team, or other Syngenta Group global managers;
- d. Syngenta Group companies, including SCPLLC, do not contract with or compensate each other for this testing;

- e. Rather, the cost of such testing is included in the testing companies' operating budgets, which are established and approved by the Syngenta Group's global product development managers and the SEC;
- f. If a product shows promise based on this testing and the potential markets for the product, either global or regional leaders (depending on whether the target market is global or regional), not individual Syngenta Group companies such as SCPLLC, decide whether to sell the product;
- g. Decisions to sell the product must be approved by the SEC; and
- h. The products that are sold all bear the same Syngenta trademark and logo.

80. SCPLLC is subject to additional oversight and control by Syngenta Group global managers through a system of "reserved powers" established by SAG and applicable to all Syngenta Group companies.

81. These "reserved powers" require Syngenta Group companies to seek approval for certain decisions from higher levels within the Syngenta Group's functional reporting structure.

82. For example, although SAG permits Syngenta Group companies to handle small legal matters on their own, under the "reserved powers" system, SAG's Board of Directors must approve settlements of certain types of lawsuits against Syngenta Group companies, including SCPLLC, if their value exceeds an amount specified in the "reserved powers."

83. Similarly, the appointments of senior managers at SCPLLC must be approved by higher levels than SCPLLC's own management, board of directors, or even its direct legal owner.

84. Although SCPLLC takes the formal action necessary to appoint its own senior managers, this formal action is in fact merely the rubber-stamping of decisions that have already been made by the Syngenta Group's global management.

85. Although SAG subsidiaries, including SCPLLC, pay lip service to legal formalities that give the appearance of authority to act independently, in practice many of their acts are directed or pre-approved by the Syngenta Group's global management.

86. SAG and the global management of the Syngenta Group restrict the authority of SCPLLC to act independently in areas including:

- a. Product development;
- b. Product testing (among other things, SAG and the global management of the Syngenta Group require SCPLLC to use Syngenta Ltd.'s Central Toxicology Laboratory to design, perform, or oversee product safety testing that SCPLLC submits to the EPA in support of the registrations of paraquat and other pesticides);
- c. Production;
- d. Marketing;
- e. Sales;
- f. Human resources;
- g. Communications and public affairs;
- h. Corporate structure and ownership;
- i. Asset sales and acquisitions;
- j. Key appointments to boards, committees, and management positions;
- k. Compensation packages;
- l. Training for high-level positions; and
- m. Finance (including day-to-day cash management) and tax.

87. Under the Syngenta Group's functional management system, global managers initiate, and the global Head of Human Resources oversees, international assignments and compensation of managers employed by one Syngenta subsidiary to do

temporary work for another Syngenta subsidiary in another country. This international assignment program aims, in part, to improve Syngenta Group-wide succession planning by developing corporate talent to make employees fit for higher positions within the global Syngenta Group of companies.

88. Under this international assignment program, at the instance of Syngenta Group global managers, SCPLLC officers and employees have been “seconded” to work at other SAG subsidiaries, and officers and employees of other Syngenta Group subsidiaries have been “seconded” to work at SCPLLC.

89. The Syngenta Group’s functional management system includes a central global finance function—known as Syngenta Group Treasury—for the entire Syngenta Group.

90. The finances of all Syngenta Group companies are governed by a global treasury policy that subordinates the financial interests of SAG’s subsidiaries, including SCPLLC, to the interests of the Syngenta Group as a whole.

91. Under the Syngenta Group’s global treasury policy, Syngenta Group Treasury controls daily cash sweeps from subsidiaries such as SCPLLC, holds the cash on account, and lends it to other subsidiaries that need liquidity.

92. The Syngenta Group’s global treasury policy does not allow SAG subsidiaries such as SCPLLC to seek or obtain financing from non-Syngenta entities without the approval of Syngenta Group Treasury.

93. Syngenta Group Treasury also decides whether SCPLLC will issue a dividend or distribution to its direct parent company, and how much that dividend will be.

94. SCPLLC's board or management approves dividends and distributions mandated by Syngenta Group Treasury without any meaningful deliberation.

95. SAG, through its agent or alter ego, SCPLLC, does substantial business in the State of Georgia, in the ways previously alleged as to SCPLLC.

B. Paraquat manufacture, distribution, and sale

96. ICI, a legacy company of Syngenta, claims to have discovered the herbicidal properties of paraquat in 1955.

97. The leading manufacturer of paraquat is Syngenta, which (as ICI) developed the active ingredient in paraquat in the early 1960s.

98. ICI produced the first commercial paraquat formulation and registered it in England in 1962.

99. Paraquat was marketed in 1962 under the brand name Gramoxone.

100. Paraquat first became commercially available for use in the United States in 1964.

101. In or about 1964, ICI and Chevron Chemical entered into agreements regarding the licensing and distribution of paraquat ("the ICI-Chevron Chemical Agreements").

102. In or about 1971, ICI Americas became a party to the ICI-Chevron Chemical Agreements on the same terms as ICI.

103. The ICI-Chevron Chemical Agreements were renewed or otherwise remained in effect until about 1986.

104. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas granted Chevron Chemical a license to their patents and technical information to permit Chevron

Chemical to formulate or have formulated, use, and sell paraquat in the United States and to grant sub-licenses to others to do so.

105. In the ICI-Chevron Chemical Agreements, Chevron Chemical granted ICI and ICI Americas a license to its patents and technical information to permit ICI and ICI Americas to formulate or have formulated, use, and sell paraquat throughout the world and to grant sub-licenses to others to do so.

106. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas and Chevron Chemical agreed to exchange patent and technical information regarding paraquat.

107. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas granted Chevron Chemical exclusive rights to distribute and sell paraquat in the United States.

108. In the ICI-Chevron Chemical Agreements, ICI and ICI Americas granted Chevron Chemical a license to distribute and sell paraquat in the U.S. under the ICI-trademarked brand name Gramoxone.

109. ICI and ICI Americas and Chevron Chemical entered into the ICI-Chevron Chemical Agreements to divide the worldwide market for paraquat between them.

110. Under the ICI-Chevron Chemical Agreements, Chevron Chemical distributed and sold paraquat in the U.S. and ICI and ICI Americas distributed and sold paraquat outside the United States.

111. Under the ICI-Chevron Chemical Agreements and related agreements, both ICI and ICI Americas and Chevron Chemical distributed and sold paraquat under the ICI-trademarked brand name Gramoxone.

112. Under the ICI-Chevron Chemical Agreements, ICI and ICI Americas and Chevron Chemical exchanged patent and technical information regarding paraquat.

113. Under the ICI-Chevron Chemical Agreements, ICI and ICI Americas provided to Chevron Chemical health and safety and efficacy studies performed or procured by ICI's Central Toxicology Laboratory, which Chevron Chemical then submitted to the USDA and the EPA to secure and maintain the registration of paraquat for manufacture, formulation, distribution, and sale for use in the United States.

114. Under the ICI-Chevron Chemical Agreements and related agreements, ICI and ICI Americas manufactured and sold paraquat to Chevron Chemical that Chevron Chemical then distributed and sold in the United States, including in Georgia, where Chevron Chemical registered paraquat products with the State of Georgia and marketed, advertised, and promoted them to Georgia distributors, dealers, applicators, and farmers.

115. Under the ICI-Chevron Chemical Agreements and related agreements, Chevron Chemical distributed and sold paraquat in the United States under the ICI-trademarked brand name Gramoxone and other names, including in Georgia, where Chevron Chemical registered such products with the State of Georgia to enable them to be lawfully distributed, sold, and used in Georgia, and marketed, advertised, and promoted them to Georgia distributors, dealers, applicators, and farmers.

116. SAG and its corporate predecessors and others with whom they acted in concert have manufactured, formulated, distributed, and sold paraquat for use in the United States from about 1964 through the present, and at all relevant times intended or expected their paraquat products to be distributed and sold in Georgia, where they registered such products with the State of Georgia to enable them to be lawfully distributed, sold, and used in Georgia, and marketed, advertised, and promoted them to Georgia distributors, dealers, applicators, and farmers.

117. SAG and its corporate predecessors and others with whom they acted in concert have submitted health and safety and efficacy studies to the USDA and the EPA to support the registration of paraquat for manufacture, formulation, distribution, and sale for use in the United States from about 1964 through the present.

118. SCPLLC and its corporate predecessors and others with whom they acted in concert have manufactured, formulated, distributed, and sold paraquat for use in the United States from about 1971 through the present, and at all relevant times intended or expected their paraquat products to be distributed and sold in Georgia, where they registered such products with the State of Georgia to enable them to be lawfully distributed, sold, and used in Georgia, and marketed, advertised, and promoted them to Georgia distributors, dealers, applicators, and farmers.

119. SCPLLC and its corporate predecessors and others with whom they acted in concert have submitted health and safety and efficacy studies to the EPA to support the registration of paraquat for manufacture, formulation, distribution, and sale for use in the U.S. from about 1971 through the present.

120. On information and belief, Chevron Chemical manufactured, formulated, distributed, and sold paraquat for use in the United States, acting in concert with ICI and ICI Americas throughout this period, including in Georgia, where Chevron Chemical registered such products with the State of Georgia to enable them to be lawfully distributed, sold, and used in Georgia, and marketed, advertised, and promoted them to Georgia distributors, dealers, applicators, and farmers.

121. From approximately 2017-2019, Plaintiff was repeatedly exposed to and inhaled, ingested, or absorbed paraquat in the State of Georgia while employed as an applicator.

122. As a direct result of the Plaintiff's exposure to paraquat, Plaintiff began suffering symptoms associated with Parkinson's Disease and was diagnosed with PD in 2019.

123. No doctor or any other person ever told Plaintiff that the Plaintiff's Parkinson's disease was or could have been caused by exposure to paraquat.

124. Before mid-2021, Plaintiff had never read or heard of any articles in newspapers, scientific journals, or other publications that associated Parkinson's Disease with paraquat.

125. Before mid-2021, Plaintiff had never read or heard of any lawsuit alleging that paraquat causes Parkinson's disease.

126. At no time when Plaintiff was present as paraquat was being sprayed was he aware that exposure to paraquat could cause any latent injury, including any neurological injury or Parkinson's Disease, or that any precautions were necessary to prevent any latent injury that could be caused by exposure to paraquat.

127. On information and belief, the paraquat to which Plaintiff was exposed was sold and used in Georgia, and was manufactured, distributed, and on information and belief sold by one or more of the Defendants and their corporate predecessors and others with whom they acted in concert intending or expecting that it would be sold and used in Georgia.

128. On information and belief, Plaintiff was exposed to paraquat manufactured, distributed, and sold at different times as to each Defendant, its corporate

predecessors, and others with whom they acted in concert, and not necessarily throughout the entire period of the Plaintiff's exposure as to any particular Defendant, its corporate predecessors, and others with whom they acted in concert.

129. On information and belief, Plaintiff was exposed to paraquat that was sold and used in Georgia, and was manufactured, distributed, and sold by SCPLLC, its corporate predecessors, and others with whom they acted in concert, including Chevron Chemical, intending or expecting that it would be sold and used in Georgia.

130. On information and belief, Plaintiff was exposed to paraquat that was sold and used in Georgia, and was manufactured, distributed, and sold by SAG, its corporate predecessors, and others with whom they acted in concert, including Chevron Chemical, intending or expecting that it would be sold and used in Georgia.

131. On information and belief, Plaintiff was exposed to paraquat that was sold and used in Georgia, and was manufactured, distributed, and sold by Chevron Chemical, acting in concert with ICI and ICI Americas, intending or expecting that it would be sold and used in Georgia.

C. Paraquat use

132. Since 1964, paraquat has been used in the United States to kill broadleaf weeds and grasses before the planting or emergence of more than 100 field, fruit, vegetable, and plantation crops, to control weeds in orchards, and to desiccate (dry) plants before harvest. At all relevant times, the use of Defendants' paraquat for these purposes was intended or directed by or reasonably foreseeable to, and was known to or foreseen by, Defendants.

133. At all relevant times, where paraquat was used, it was commonly used multiple times per year on the same land, particularly when used to control weeds in orchards or on farms with multiple crops planted on the same land within a single growing season or year, and such use was as intended or directed or reasonably foreseeable. The use of Defendants' paraquat for these purposes was intended or directed by or reasonably foreseeable to, and was known to or foreseen by, Defendants.

134. At all relevant times, paraquat manufactured, distributed, sold, and sprayed or caused to be sprayed by Defendants, Defendants' corporate predecessors, and others with whom they acted in concert was typically sold to end-users in the form of liquid concentrates (and less commonly in the form of granular solids) designed to be diluted with water before or after loading it into the tank of a sprayer and applied by spraying it onto target weeds.

135. At all relevant times, concentrates containing paraquat manufactured, distributed, sold, and sprayed or caused to be sprayed by Defendants, Defendants' corporate predecessors, and others with whom they acted in concert typically were formulated with one or more "surfactants" to increase the ability of the herbicide to stay in contact with the leaf, penetrate the leaf's waxy surface, and enter into plant cells, and the accompanying instructions typically told end-users to add a surfactant or crop oil (which as typically formulated contains a surfactant) before use.

136. At all relevant times, paraquat typically was applied with a knapsack sprayer, handheld sprayer, aircraft (i.e., crop duster), truck with attached pressurized tank, or tractor-drawn pressurized tank, and such use was as intended or directed or was reasonably foreseeable.

D. Paraquat exposure

137. At all relevant times, it was reasonably foreseeable that when paraquat was used in the manner intended or directed or in a reasonably foreseeable manner, users of paraquat and persons nearby would be exposed to paraquat while it was being mixed and loaded into the tanks of sprayers, including as a result of spills, splashes, and leaks.

138. At all relevant times, it was reasonably foreseeable that when paraquat was used in the manner intended or directed or in a reasonably foreseeable manner, persons who sprayed paraquat or were in or near areas where it was being or recently had been sprayed would be exposed to paraquat, including as a result of spray drift, the movement of herbicide spray droplets from the target area to an area where herbicide application was not intended, typically by wind, and as a result of contact with sprayed plants.

139. At all relevant times, it was reasonably foreseeable that when paraquat was used in the manner intended or directed or in a reasonably foreseeable manner, users of paraquat and persons nearby would be exposed to paraquat, including as a result of spills, splashes, and leaks, while equipment used to spray it was being emptied or cleaned or clogged spray nozzles, lines, or valves were being cleared.

140. At all relevant times, it was reasonably foreseeable that paraquat could enter the human body via absorption through or penetration of the skin, mucous membranes, and other epithelial tissues, including tissues of the mouth, nose and nasal passages, trachea, and conducting airways, particularly where cuts, abrasions, rashes, sores, or other tissue damage was present.

141. At all relevant times, it was reasonably foreseeable that paraquat could enter the human body via respiration into the lungs, including the deep parts of the lungs where respiration (gas exchange) occurred.

142. At all relevant times, it was reasonably foreseeable that paraquat could enter the human body via ingestion into the digestive tract of small droplets swallowed after entering the mouth, nose, or conducting airways.

143. At all relevant times, it was reasonably foreseeable that paraquat that entered the human body via ingestion into the digestive tract could enter the enteric nervous system (the part of the nervous system that governs the function of the gastrointestinal tract).

144. At all relevant times, it was reasonably foreseeable that paraquat that entered the human body, whether via absorption, respiration, or ingestion, could enter the bloodstream.

145. At all relevant times, it was reasonably foreseeable that paraquat that entered the bloodstream could enter the brain, whether through the blood-brain barrier or parts of the brain not protected by the blood-brain barrier.

146. At all relevant times, it was reasonably foreseeable that paraquat that entered the nose and nasal passages could enter the brain through the olfactory bulb (a part of the brain involved in the sense of smell), which is not protected by the blood-brain barrier.

E. Parkinson's disease

147. PD is progressive neurodegenerative disorder of the brain that affects primarily the motor system, the part of the central nervous system that controls movement.

148. Scientists who study PD generally agree that fewer than 10% of all PD cases are caused by inherited genetic mutations alone, and that more than 90% are caused by a combination of environmental factors, genetic susceptibility, and the aging process.

1. Symptoms and treatment

149. The characteristic symptoms of PD are its “primary” motor symptoms: resting tremor (shaking movement when the muscles are relaxed), bradykinesia (slowness in voluntary movement and reflexes), rigidity (stiffness and resistance to passive movement), and postural instability (impaired balance).

150. PD’s primary motor symptoms often result in “secondary” motor symptoms such as freezing of gait; shrinking handwriting; mask-like expression; slurred, monotonous, quiet voice; stooped posture; muscle spasms; impaired coordination; difficulty swallowing; and excess saliva and drooling caused by reduced swallowing movements.

151. Non-motor symptoms-such as loss of or altered sense of smell; constipation; low blood pressure on rising to stand; sleep disturbances; and depression-are present in most cases of PD, often for years before any of the primary motor symptoms appear.

152. There is currently no cure for PD. No treatment will slow, stop, or reverse its progression, and the treatments most-commonly prescribed for its motor symptoms tend to become progressively less effective, and to cause unwelcome side effects, the longer they are used.

2. Pathophysiology

153. The selective degeneration and death of dopaminergic neurons (dopamine-producing nerve cells) in a part of the brain called the substantia nigra pars compacta (“SNpc”) is one of the primary pathophysiological hallmarks of PD.

154. Dopamine is a neurotransmitter (a chemical messenger that transmits signals from one neuron to another neuron, muscle cell, or gland cell) that is critical to the brain’s control of motor function (among other things).

155. The death of dopaminergic neurons in the SNpc decreases the production of dopamine.

156. Once dopaminergic neurons die, they are not replaced; when enough dopaminergic neurons have died, dopamine production falls below the level the brain requires for proper control of motor function, resulting in the motor symptoms of PD.

157. The presence of Lewy bodies (insoluble aggregates of a protein called alpha-synuclein) in many of the remaining dopaminergic neurons in the SNpc is another of the primary pathophysiological hallmarks of PD.

158. Dopaminergic neurons are particularly susceptible to oxidative stress, a disturbance in the normal balance between oxidants present in cells and cells’ antioxidant defenses.

159. Scientists who study PD generally agree that oxidative stress is a major factor in—if not the precipitating cause of—the degeneration and death of dopaminergic neurons in the SNpc and the accumulation of Lewy bodies in the remaining dopaminergic neurons that are the primary pathophysiological hallmarks of PD.

F. Paraquat’s toxicity

160. Paraquat is highly toxic to both plants and animals.

161. Paraquat injures and kills plants by creating oxidative stress that causes or contributes to cause the degeneration and death of plant cells.

162. Paraquat injures and kills humans and other animals by creating oxidative stress that causes or contributes to cause the degeneration and death of animal cells.

163. Paraquat creates oxidative stress in the cells of plants and animals because of “redox properties” that are inherent in its chemical composition and structure: it is a strong oxidant, and it readily undergoes “redox cycling” in the presence of molecular oxygen, which is plentiful in living cells.

164. The redox cycling of paraquat in living cells interferes with cellular functions that are necessary to sustain life—photosynthesis in the case of plant cells and cellular respiration in the case of animal cells.

165. The redox cycling of paraquat in living cells creates a “reactive oxygen species” known as superoxide radical, an extremely reactive molecule that can initiate a cascading series of chemical reactions that creates other reactive oxygen species that damage lipids, proteins, and nucleic acids—molecules that are essential components of the structures and functions of living cells.

166. Because the redox cycling of paraquat can repeat indefinitely in the conditions typically present in living cells, a single molecule of paraquat can trigger the production of countless molecules of destructive superoxide radical.

167. Paraquat’s redox properties have been known since at least the 1930s.

168. That paraquat is toxic to the cells of plants and animals because it creates oxidative stress through redox cycling has been known since at least the 1960s.

169. The surfactants with which the concentrates containing paraquat manufactured, distributed, and sold by Defendants, Defendants' corporate predecessors, and others with whom they acted in concert typically were formulated were likely to increase paraquat's toxicity to humans by increasing its ability to stay in contact with or penetrate the skin, mucous membranes, and other epithelial tissues, including tissues of the mouth, nose and nasal passages, trachea, and conducting airways, the lungs, and the gastrointestinal tract.

G. Paraquat and Parkinson's disease

170. The same redox properties that make paraquat toxic to plant cells and other types of animal cells make it toxic to dopaminergic neurons—paraquat is a strong oxidant that interferes with the function of, damages, and ultimately kills dopaminergic neurons by creating oxidative stress through redox cycling.

171. Although PD is not known to occur naturally in any species other than humans, PD research is often performed using “animal models,” in which scientists artificially produce in laboratory animals conditions that show features of PD.

172. Paraquat is one of only a handful of toxins that scientists use to produce animal models of PD.

173. In animal models of PD, hundreds of studies involving various routes of exposure have found that paraquat creates oxidative stress that results in the degeneration and death of dopaminergic neurons in the SNpc, other pathophysiology consistent with that seen in human PD, and motor deficits and behavioral changes consistent with those commonly seen in human PD.

174. Hundreds of in vitro studies have found that paraquat creates oxidative stress that results in the degeneration and death of dopaminergic neurons (and many other types of animal cells).

175. Many epidemiological studies (studies of the patterns and causes of disease in defined populations) have found an association between paraquat exposure and PD, including multiple studies finding a two- to five-fold or greater increase in the risk of PD in populations with occupational exposure to paraquat compared to populations without such exposure.

176. Defendants had knowledge of these studies and the relationship between paraquat exposure and PD but actively and fraudulently concealed this information from Plaintiff and others.

H. Paraquat regulation

177. The Federal Insecticide, Fungicide, and Rodenticide Act (“FIFRA”), 7 U.S.C. §136 *et seq.*, which regulates the distribution, sale, and use of pesticides within the United States, requires that pesticides be registered with the EPA prior to their distribution, sale, or use, except as described by FIFRA. 7 U.S.C. 136a(a).

178. As part of the pesticide registration process, the EPA requires, among other things, a variety of tests to evaluate the potential for exposure to pesticides, toxicity to people and other potential non-target organisms, and other adverse effects on the environment.

179. As a general rule, FIFRA requires registrants to perform health and safety testing of pesticides.

180. FIFRA does not require the EPA to perform health and safety testing of pesticides itself, and the EPA generally does not perform such testing.

181. The EPA registers (or re-registers) a pesticide if it believes, based largely on studies and data submitted by the registrant, that:

- a. its composition is such as to warrant the proposed claims for it, 7 U.S.C. §136a(c)(5)(A);
- b. its labeling and other material required to be submitted comply with the requirements of FIFRA, 7 U.S.C. § 136a(c)(5)(B);
- c. it will perform its intended function without unreasonable adverse effects on the environment, 7 U.S.C. § 136a(c)(5)(C); and
- d. when used in accordance with widespread and commonly recognized practice it will not generally cause unreasonable adverse effects on the environment, 7 U.S.C. § 136a(c)(5)(D).

182. FIFRA defines “unreasonable adverse effects on the environment” as “any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide.” 7 U.S.C. § 136(bb).

183. Under FIFRA, “[a]s long as no cancellation proceedings are in effect registration of a pesticide shall be prima facie evidence that the pesticide, its labeling and packaging comply with the registration provisions of [FIFRA].” 7 U.S.C. § 136a(f)(2).

184. However, FIFRA further provides that “[i]n no event shall registration of an article be construed as a defense for the commission of any offense under [FIFRA].” 7 U.S.C. § 136a(f)(2).

185. The distribution or sale of a pesticide that is misbranded is an offense under FIFRA, which provides in relevant part that “it shall be unlawful for any person in any State to distribute or sell to any person . . . any pesticide which is . . . misbranded.” 7 U.S.C. § 136j(a)(1)(E).

186. A pesticide is misbranded under FIFRA if, among other things:
- a. its labeling bears any statement, design, or graphic representation relative thereto or to its ingredients that is false or misleading in any particular, 7 U.S.C. § 136(q)(1)(A);
 - b. the labeling accompanying it does not contain directions for use which are necessary for effecting the purpose for which the product is intended and if complied with, together with any requirements imposed under Section 136a(d) of the title, are adequate to protect health and the environment, 7 U.S.C. §136(q)(1)(F); or
 - c. the label does not contain a warning or caution statement that may be necessary and if complied with, together with any requirements imposed under section 136a(d) of the title, is adequate to protect health and the environment,” 7 U.S.C. § 136(q)(1)(G).

187. Plaintiff does not seek in this action to impose on Defendants any labeling or packaging requirement in addition to or different from those required under FIFRA; accordingly, any allegation in this complaint that a Defendant breached a duty to provide adequate directions for the use of paraquat or warnings about paraquat, breached a duty to provide adequate packaging for paraquat, or concealed, suppressed, or omitted to disclose any material fact about paraquat or engaged in any unfair or deceptive practice regarding paraquat, that allegation is intended and should be construed to be consistent with that alleged breach, concealment, suppression, or omission, or unfair or deceptive practice, having rendered the paraquat “misbranded” under FIFRA; however, Plaintiff brings claims and seek relief in this action only under state law, and do not bring any claims or seek any relief in this action under FIFRA.

V. ALLEGATIONS COMMON TO SPECIFIC CAUSES OF ACTION

A. Strict Product Liability – Design Defect

188. At all relevant times, Defendants, Defendants’ corporate predecessors, and others with whom they acted in concert were engaged in the U.S. paraquat business.

189. At all relevant times, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Georgia.

190. Plaintiff was exposed to paraquat sold and used in Georgia that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Georgia.

191. The paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was in a defective condition that made it unreasonably dangerous, in that when used in the intended and directed manner or a reasonably foreseeable manner:

- a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and
- b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

192. This defective condition existed in the paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed when it left the

control of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert and was placed into the stream of commerce.

193. As a result of this defective condition, the paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed either failed to perform in the manner reasonably to be expected in light of its nature and intended function, or the magnitude of the dangers outweighed its utility.

194. The paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was used in the intended and directed manner or a reasonably foreseeable manner.

B. Strict Product Liability – Failure to Warn

195. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Georgia.

196. Plaintiff was exposed to paraquat sold and used in Georgia that Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Georgia.

197. When Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold the paraquat to which Plaintiff was exposed, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert knew or in the exercise of ordinary care should have known that when used in the intended and directed manner or a reasonably foreseeable manner:

- a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and
- b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

198. The paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was in a defective condition that made it unreasonably dangerous when it was used in the intended and directed manner or a reasonably foreseeable manner, in that:

- a. it was not accompanied by directions for use that would have made it unlikely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and
- b. it was not accompanied by a warning that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and that repeated exposures were likely to cause or contribute

to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

199. This defective condition existed in the paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed when it left the control of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert and was placed into the stream of commerce.

200. As a result of this defective condition, the paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed either failed to perform in the manner reasonably to be expected in light of its nature and intended function, or the magnitude of the dangers outweighed its utility.

201. The paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was used in the intended and directed manner or a reasonably foreseeable manner.

C. Violation of Georgia's Fair Business Practices Act (Ga. Code Ann. §§ 10-1-390 et seq.)

202. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Georgia.

203. Plaintiff Donald Newton was exposed to paraquat sold and used in Georgia

that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Georgia and that Plaintiff Donald Newton or Plaintiff Donald Newton's employer purchased for the purpose of controlling weeds.

204. This Count is brought pursuant to Georgia's Fair Business Practices Act (Ga. Code Ann. § 10-1-390).

205. At all times relevant to this claim, Plaintiff Donald Newton, and Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were persons within the meaning of Ga. Code Ann. § 10-1-392(24).

206. At all times relevant to this claim, Plaintiff Donald Newton was a consumer within the meaning of Ga. Code Ann. § 10-1-390(6).

207. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were engaged in the conduct of trade and commerce within the meaning of Ga. Code Ann. § 10-1-390(28).

208. Georgia's Fair Business Practices Act Ga. Code Ann. § 10-1-393 provides in pertinent part:

- a. Unfair or deceptive acts or practices in the conduct of consumer transactions or practices in trade or commerce are declared unlawful

209. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert had actual or constructive knowledge that when used in the intended and directed manner or a reasonably foreseeable manner:

- a. paraquat was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and
- b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

210. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert had actual or constructive knowledge that:

- a. adequate testing had not been performed to determine the extent to which exposure to paraquat was likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;
- b. adequate testing had not been performed to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;
- c. adequate testing had not been performed to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;
- d. adequate testing had not been performed to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the

bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

211. From the first date on which Defendants, Defendants' corporate predecessors, and others with whom they acted in concert placed paraquat that they designed, manufactured, distributed and sold into the stream of commerce for use in the State of Georgia through the last date on which Plaintiff Donald Newton was exposed to paraquat that they designed, manufactured, distributed, and sold for use in the State of Georgia, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert engaged in unfair or deceptive acts or practices, including but not limited to deception, fraud, false pretense, false promise, misrepresentation or the concealment, suppression, or omission of material facts, regarding their design, manufacture, distribution, and sale of paraquat for use in the State of Georgia, in that they:

- a. concealed, suppressed, or omitted to disclose that paraquat was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;
- b. concealed, suppressed, or omitted to disclose that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.
- c. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which exposure to paraquat was

likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

- d. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;
- e. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;
- f. concealed, suppressed, or omitted to disclose that adequate testing had not been performed to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

212. These acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Georgia were "unfair" because they offended public policy, were immoral, unethical, oppressive, and unscrupulous, and caused substantial injury to consumers.

213. These acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling

paraquat for use in the State of Georgia offended the clearly stated public policy of the State of Georgia.

214. These acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Georgia offended the public policy of the State of Georgia.

215. These acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Georgia were immoral and unethical, as they served only to benefit Defendants, Defendants' corporate predecessors, and others with whom they acted in concert at the expense of the health of purchasers and users of paraquat and the public.

216. These acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Georgia were likely to cause substantial injury to purchasers and users of paraquat and the public by exposing them to unnecessary risks to their health.

217. These acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Georgia were likely to cause, and did cause, substantial injury to purchasers and users of paraquat and the public in that but for these acts and practices paraquat would not have been purchased for use in Georgia and persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed would not have been injured by it.

218. The injuries caused by these acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing,

distributing and selling paraquat for use in the State of Georgia, namely purchasers' monetary losses and the injuries and damages (including monetary losses) to persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, including Plaintiff, are not outweighed by any countervailing benefit to consumers or competition.

219. The injuries caused by these acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing and selling paraquat for use in the State of Georgia, namely purchasers' monetary losses and the injuries and damages (including monetary losses) to persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, including Plaintiff, were not reasonably avoidable; because Defendants, Defendants' corporate predecessors, and others with whom they acted in concert in manufacturing, distributing, and selling paraquat for use in the State of Georgia were the sole sources of material information and they failed to disclose this information, and consumers therefore could not have had reason to anticipate the impending harm and thus avoid their injuries.

220. Defendants, Defendants' corporate predecessors, and others with whom they acted in concert intended that purchasers of the paraquat that they manufactured, distributed, and sold and to which Plaintiff Donald Newton was exposed purchase it in reliance on these unfair and deceptive acts and practices.

221. The facts that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert concealed, suppressed, or omitted to disclose were material to the decisions to purchase the paraquat that Defendants, Defendants' corporate

predecessors, and others with whom they acted in concert manufactured, distributed, and sold and to which Plaintiff Donald Newton was exposed, in that it would not have been purchased had these facts been disclosed.

222. These unfair and deceptive acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert occurred in connection with their conduct of trade and commerce in the State of Georgia.

223. These unfair and deceptive acts and practices of Defendants, Defendants' corporate predecessors, and others with whom they acted in concert violated to Georgia's Fair Business Practices Act Ga. Code Ann. §§ 10-1-390.

D. Negligence

224. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Georgia.

225. Plaintiff was exposed to paraquat sold and used in Georgia that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Georgia.

226. The paraquat that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold and to which Plaintiff was exposed was used in the intended and directed manner or a reasonably foreseeable manner.

227. At all times relevant to this claim, in designing, manufacturing, packaging, labeling, distributing, and selling paraquat, and in acting in concert with others who did so, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert owed a duty to exercise ordinary care for the health and safety of the persons whom it was reasonably foreseeable could be exposed to it, including Plaintiff.

228. When Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, packaged, labeled, distributed, and sold the paraquat to which Plaintiff was exposed, it was reasonably foreseeable, and Defendants, Defendants' corporate predecessors, and others with whom they acted in concert knew or in the exercise of ordinary care should have known, that when paraquat was used in the intended and directed manner or a reasonably foreseeable manner:

- a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and
- b. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

229. In breach of the aforementioned duty to Plaintiff, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert negligently:

- a. failed to design, manufacture, formulate, and package paraquat to make it unlikely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;

- b. designed, manufactured, and formulated paraquat such that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;
- c. failed to perform adequate testing to determine the extent to which exposure to paraquat was likely to occur through inhalation, ingestion, and absorption into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed;
- d. failed to perform adequate testing to determine the extent to which paraquat spray drift was likely to occur, including its propensity to drift, the distance it was likely to drift, and the extent to which paraquat spray droplets were likely to enter the bodies of persons spraying it or other persons nearby during or after spraying;
- e. failed to perform adequate testing to determine the extent to which paraquat, when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;
- f. failed to perform adequate testing to determine the extent to which paraquat, when formulated or mixed with surfactants or other pesticides or used along with other pesticides, and inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and the extent to which repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure;
- g. failed to direct that paraquat be used in a manner that would have made it unlikely to have been inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and

- h. failed to warn that when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, paraquat was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.

E. Breach of Express Warranties and Implied Warranty of Merchantability

230. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling paraquat and other restricted-use pesticides and themselves out as having knowledge or skill regarding paraquat and other restricted-use pesticides.

231. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Georgia.

232. Plaintiff was exposed to paraquat sold and used in Georgia that Defendants, Defendants' corporate predecessors, and others with whom they acted in concert designed, manufactured, distributed, and sold intending or expecting that it would be sold and used in Georgia.

233. At the time of each sale of paraquat to which Plaintiff was exposed, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert made express warranties pursuant to Ga. Code Ann. § 11-2-313 and/or impliedly warranted that it was of merchantable quality pursuant to Ga. Code Ann. § 11-2-314, including that it was

fit for the ordinary purposes for which such goods were used pursuant Ga. Code Ann. § 11-2-315.

234. Defendants, Defendants' corporate predecessors, and others with whom they acted in concert breached this warranty regarding each sale of paraquat to which Plaintiff was exposed, in that it was not of merchantable quality because it was not fit for the ordinary purposes for which such goods were used, and in particular:

- a. it was designed, manufactured, formulated, and packaged such that it was likely to be inhaled, ingested, and absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed; and
- c. when inhaled, ingested, or absorbed into the bodies of persons who used it, who were nearby while it was being used, or who entered fields or orchards where it had been sprayed or areas near where it had been sprayed, it was likely to cause or contribute to cause latent neurological damage that was both permanent and cumulative, and repeated exposures were likely to cause or contribute to cause clinically significant neurodegenerative disease, including PD, to develop long after exposure.
- d. the failure to disclose that paraquat had dangerous propensities when used as intended and that that use of and exposure to paraquat carries an increased risk of developing severe injuries, including Parkinson's disease.

F. Claims pursuant to GA Code § 51-1-11

235. At all times relevant to this claim, Defendants, Defendants' corporate predecessors, and others with whom they acted in concert were engaged in the business of designing, manufacturing, distributing, and selling pesticides, and designed, manufactured, distributed, and sold paraquat intending or expecting that it would be sold and used in Georgia.

236. For the reasons set forth above, Plaintiff asserts and alleges that Defendants are liable to Plaintiff under Section 51-1-11 of the Georgia Code because Defendants'

paraquat was, and is, not merchantable or reasonably suited for their intended use at the time of sale to Plaintiff, and this condition is the proximate cause of Plaintiff's injuries.

237. Among other reasons, Defendants' paraquat is, and was, not merchantable or reasonably suited for their intended use for the following reasons:

- a. Paraquat did not perform in a safe manner or in the manner reasonably expected by Plaintiff in light of the product's function as an herbicide;
- b. Paraquat did not have adequate warnings of its dangers and risks of harm as set forth above; and
- c. the risks of paraquat far outweigh its utility as an herbicide.

238. As a direct and proximate result of Plaintiff's use of paraquat Plaintiff suffered harm, damages and economic loss and will continue to suffer such harm, damages and economic loss in the future.

239. As a direct and proximate result of the foregoing, Plaintiff is entitled to damages pursuant to the common law and applicable state statutes.

COUNT 1
DEFENDANTS SCPLLC AND SAG
STRICT PRODUCT LIABILITY – DESIGN DEFECT – PURSUANT TO
COMMON LAW AND GA CODE § 51-1-11
PERSONAL INJURIES

240. Plaintiff incorporates by reference the foregoing paragraphs of this Complaint.

241. Plaintiff alleges and asserts that paraquat is defectively designed in that it is, and was, not merchantable or reasonably suited for their intended use as an herbicide at the time of the sale of this product to Plaintiff, and this defective design caused Plaintiff's injuries, as contemplated under Section 51-1-11 of the Georgia Code.

242. As a direct and proximate result of the defective and unreasonably dangerous condition of the paraquat manufactured, distributed, and sold by SCPLLC, SAG, their corporate predecessors, and others with whom they acted in concert, Plaintiff developed PD; has suffered severe and permanent physical pain, mental anguish, and disability, and will continue to do so for the remainder of the Plaintiff's life; has suffered the loss of a normal life and will continue to do so for the remainder of the Plaintiff's life; has lost income that he otherwise would have earned and will continue to do so for the remainder of the Plaintiff's life; and has incurred reasonable expenses for necessary medical treatment and will continue to do so for the remainder of the Plaintiff's life.

COUNT 2
DEFENDANTS SCPLLC AND SAG
STRICT PRODUCT LIABILITY – FAILURE TO WARN PURSUANT TO
COMMON LAW AND GA CODE § 51-1-11
PERSONAL INJURIES

243. Plaintiff incorporates by reference the foregoing paragraphs of this Complaint.

244. Plaintiff also alleges and asserts that paraquat is, and was, not merchantable or reasonably suited for their intended use as an herbicide at the time of the sale of this product to Plaintiff, as contemplated under Section 51-1-11 of the Georgia Code, in part, due to the product's inadequate warning, as discussed above.

245. As a direct and proximate result of the lack of adequate directions for the use of and warnings about the dangers of the paraquat manufactured, distributed and sold by SCPLLC, SAG, their corporate predecessors, and others with whom they acted in concert, Plaintiff developed PD; has suffered severe and permanent physical pain, mental anguish, and disability, and will continue to do so for the remainder of the Plaintiff's life; has suffered

the loss of a normal life and will continue to do so for the remainder of the Plaintiff's life; has lost income that he otherwise would have earned and will continue to do so for the remainder of the Plaintiff's life; and has incurred reasonable expenses for necessary medical treatment and will continue to do so for the remainder of the Plaintiff's life.

COUNT 3
DEFENDANTS SCPLLC AND SAG
NEGLIGENCE
PERSONAL INJURIES

246. Plaintiff incorporates by reference the foregoing paragraphs of this Complaint.

247. As a direct and proximate result of the negligence of SCPLLC, SAG, their corporate predecessors, and others with whom they acted in concert, Plaintiff developed PD; has suffered severe and permanent physical pain, mental anguish, and disability, and will continue to do so for the remainder of the Plaintiff's life; has suffered the loss of a normal life and will continue to do so for the remainder of the Plaintiff's life; has lost income that he otherwise would have earned and will continue to do so for the remainder of the Plaintiff's life; and has incurred reasonable expenses for necessary medical treatment and will continue to do so for the remainder of the Plaintiff's life.

COUNT 4
DEFENDANTS SCPLLC AND SAG
BREACH OF EXPRESS WARRANTIES AND IMPLIED WARRANTY OF
MERCHANTABILITY – PURSUANT TO COMMON LAW AND GA. CODE ANN.
§ 11-2-313; GA. CODE ANN. § 11-2-314; AND GA. CODE ANN. § 11-2-315
PERSONAL INJURIES

248. Plaintiff incorporates by reference the foregoing paragraphs of this Complaint.

249. As a direct and proximate result of the breaches of express warranty and the implied warranty of merchantability by SCPLLC, SAG, their corporate predecessors, and others with whom they acted in concert, Plaintiff developed PD; has suffered severe and permanent physical pain, mental anguish, and disability, and will continue to do so for the remainder of the Plaintiff's life; has suffered the loss of a normal life and will continue to do so for the remainder of the Plaintiff's life; has lost income that he otherwise would have earned and will continue to do so for the remainder of the Plaintiff's life; and has incurred reasonable expenses for necessary medical treatment and will continue to do so for the remainder of the Plaintiff's life.

COUNT 5
DEFENDANTS SCPLLC AND SAG
VIOLATION OF GEORGIA'S FAIR BUSINESS PRACTICES ACT PERSONAL
INJURIES GA. CODE ANN. §§ 10-1-390 ET SEQ.

250. Plaintiff incorporates by reference the foregoing paragraphs of this Complaint.

251. As a direct and proximate result of the violations of the Georgia Fair Business Practices Act by SCPLLC, SAG, their corporate predecessors, and others with whom they acted in concert, Plaintiff developed PD; has suffered severe and permanent physical pain, mental anguish, and disability, and will continue to do so for the remainder of his life; has suffered the loss of a normal life and will continue to do so for the remainder of his life; has lost income that he otherwise would have earned and will continue to do so for the remainder of his life; and has incurred reasonable expenses for necessary medical treatment and will continue to do so for the remainder of his life.

DAMAGES

252. Plaintiff incorporates herein by reference, as though fully set forth at length, each and every allegation and statement contained in the foregoing paragraphs.

253. As a direct and proximate result of Defendants' tortious conduct and breach of duties as set forth herein, Plaintiff is entitled to be compensated for their damages.

254. Defendants are liable for punitive and/or exemplary damages under choice of law principles. Defendants acted with willful disregard of the rights of the Plaintiff and the public. Defendants' showed willful misconduct, malice, fraud, wantonness, oppression and/or conscious indifference to the consequences and toward the safety of the Plaintiff and the public.

255. Plaintiff seeks actual and punitive damages from the Defendants as alleged herein pursuant to Ga. Code Ann, § 51-12-5.1 and common law. The injuries and damages alleged herein are permanent and will continue into the future.

256. Plaintiff further reserves and hereby claims all other rights and remedies arising from the Plaintiff's injuries.

257. All of the above damages are in an amount which will be proved at trial.

PRESERVATION CLAIMS

258. Plaintiff hereby incorporates by reference all allegations contained in the preceding paragraphs, as though fully set forth herein.

259. Many States have recently enacted tort reform statutes with "exclusive remedy" provisions. Courts have yet to determine whether these exclusive remedy provisions eliminate or supersede, to any extent, state common law claims. If during the

pendency of this action this court makes any such determination, Plaintiff hereby specifically makes claim to and preserves any State claim based upon any exclusive remedy provision, under any state law this court may apply, to the extent not already alleged above.

260. To the extent that Defendant(s) may claim that one or more of Plaintiff's claims are barred by the applicable statute of limitations, Plaintiff asserts that the statute of limitations is and has been tolled by Plaintiff's discovery that the injury(ies) was/were caused by Defendants' defective product and failure to properly and adequately warn of the products' risks, all as more fully set forth in this Complaint, after the injury sustained by Plaintiff.

PRAYER FOR RELIEF

261. WHEREFORE, Plaintiff prays for judgment against Defendants, and each of them as hereinafter set forth.

262. As a result of the foregoing, Plaintiff respectfully requests that this Court enter judgment in the Plaintiff's favor and against Defendants, jointly and severally, for compensatory damages, costs, pre- and post-judgment interest, and attorneys' fees, severally for punitive damages, and for such further relief to which Plaintiff may show himself to be entitled.

DEMAND FOR JURY TRIAL

263. Pursuant to FED. R. CIV. P. 38(b), Plaintiff respectfully demands a jury trial on all issues triable by jury.

Dated: February 25, 2022

Respectfully Submitted,
